

Important Dates:

- 2025 December:
Preliminary registration start
- 2026 November:
Registration and abstract submission open
- 2027 January:
Special sessions proposal
- March:
Early bird registration close
Abstract submission close
- May:
Information on the abstract selection
- June:
Presentation of the Congress program
- July:
Late registration close

EPC9 30th August – 4th September

Since 1996, the European Phycological Congress series has brought together phycologists from around the world every four years, starting with its inaugural event in Cologne, Germany.

After our last fabulous meeting in Brest, France, we are pleased to invite you to Kraków, Poland for the 9th European Phycological Congress. Poland has a long tradition of algal research, about their taxonomy as well as ecology.

The main objective of the Congress is to provide a forum for discussion over the latest scientific, technological and societal developments in phy-cological research.

EPC9 includes plenary lectures, series of symposia grouped into thematic sessions, contributed papers and poster presentations covering a wide range of topics. We will also grant an opportunity to organise subject-specific workshops. Each symposium and workshop may address micro- and macro-algae from marine, freshwater, and terrestrial ecosystems.

We look forward to welcoming you to Krakow, Poland in August 2027 for EPC9!

**Save the date for meetings with algal folks from
30th August to 4th September 2027!**

Organisers:

- Institute of Nature Conservation Polish Academy of Sciences
- Department of Biology Jagiellonian University
- Federation of European Phycological Societies

Chairs of the Congress:

Prof. Karin Rengefors & Prof. Per Juel Hansen

*Department of Biology
Functional Ecology Unit
Lund University, Lund,
Sweden*

*Department of Biology
Marine Biological Section
University of Copenhagen,
Denmark*

Organising Committee:

Institute of Nature Conservation PAS:

- Elżbieta Wilk-Woźniak
- Martyna Budziak
- Katarzyna Chrzęścik
- Joanna Kosiba
- Wojciech Krztoń
- Edward Walusiak

Department of Biology Jagiellonian University:

- Janusz Fyda
- Edyta Fiałkowska
- Agnieszka Pajdak-Stós
